**HD MEDICAL DEBUTS HD STETH™ INTELLIGENT VISUAL STETHOSCOPE AT ARAB HEALTH
- HD Steth Offers Next-Gen Stethoscope Functionality including Integrated ECG -**

Dubai, UAE – January 29, 2019– At Arab Health, [HD Medical Inc.](#) will debut and demonstrate [HD Steth™](#) a next generation Smart Stethoscope featuring an integrated ECG for instant and accurate cardiac diagnosis. For the first time it is possible to simultaneously capture and visualize heart sounds and ECG waveforms for detecting structural, electrical, mechanical and ischemic cardiac abnormalities.

HD Steth transforms the way medicine is practiced at the point-of-care with real-time Bluetooth transmission of cardiac waveforms to a smart phone or tablet. Patient data can be transmitted via the cloud to cardiologists or other specialists for diagnosis which can then be utilized to prescribe optimum treatment. Patient data can also be captured and shared with other doctors, insurance companies and electronic medical record (EMR) systems. HD Steth enhances the accuracy of diagnosis, quality of care, saves precious time and improves outcomes, thereby delivering the Gold Standard in Cardiac Care.

“HD Steth uniquely performs Mobile Cardiac Monitoring ideal for medical applications including Triage, Screening and Monitoring, Digital and Home Health, among others, both in emerging and developed markets,” said Arvind Thiagarajan, Founder and CEO of HD Medical. “To enable these applications and serve these markets, we are actively building our distribution channels for HD Steth worldwide as we receive tremendous market response,” adds Thiagarajan.

HD Steth is currently available outside the U.S., with U.S. FDA certification anticipated by later Q3 2019. HD Medical is presently recruiting distributors and seeking strategic partnerships globally.

About HD Medical, Inc.

HD Medical, Inc. is a Silicon Valley-based innovator of digital health solutions for AI-enabled detection and management of cardio vascular disease (CVD). The company delivers its intelligent cardiac care solutions and products globally to medical professionals, hospitals and medical institutions as well as veterinarians through channel partners.
