**HD MEDICAL DEMONSTRATES VISCOPE VISUAL STETHOSCOPE AT HIMSS 15**

***- New ViScope Telemedicine Software will be Showcased -***

**Chicago, IL – April 13, 2015** – At HiMSS 15, HD Medical, Inc. demonstrates the new [ViScope®](#) visual stethoscope product family. These unique visual stethoscopes provide “dynamic auscultation™”, the ability to see what you hear. ViScope’s [integrated visual display](#) shows heart waveforms in real-time making it a perfect device for patient screening, teaching and telemedicine. HD Medical will showcase the new ViScope Telemedicine Software at the show this week. ViScope records patient heart anomalies so medical professionals can share with colleagues, students, insurance companies and electronic medical records.

The ViScope visual display is complemented by high fidelity sound quality and amplification up to 30 times louder than a traditional scope for unmatched clarity. HD Medical has invested over a decade refining its proprietary noise reduction technology.

ViScope also records patient heart sounds for 10 seconds capturing the first heart sounds, often the most telling for healthcare professionals. The scope’s heart sound recordings can be transferred to a PC configured with the ViScope [bundled software](#) to access a tunable filter that provides the ability to select specific parts of the heart sound to listen to, such as S1/S2, S3/S4, etc. ViScope’s value as a screening tool for early detection of cardiac defects has been validated through multiple clinical trials.

ViScope product family includes:

- ViScope entry level visual stethoscope for sales in the U.S. and Europe. It is FDA approved and CE certified
- ViScope MD visual stethoscope with murmur detection for sales and distributors outside the U.S.
- ViScope ECG 3-lead visual stethoscope which interprets the type of murmur for sales and distributors outside the U.S.

“HD Medical’s visual stethoscopes are uniquely capable of addressing today’s evidence based medical environment,” states Arvind Thiagarajan, Chairman and Chief Inventor for HD Medical. “ViScope is the industry’s first stethoscope to enable documentation of heart data which can be used for patient reporting and analysis as well as information sharing, teaching situations and telemedicine applications.”

ViScope has been awarded the US Food and Drug Administration (FDA) 510 (K) clearance and is CE compliant. ViScope is sold from the [website](#) and through HD Medical’s network of resellers in the USA.

**About HD Medical, Inc.**

HD Medical, Inc. is a medical device innovator based in California, USA with Corporate Offices in Sydney, Australia and Research Labs in Chennai, India. Since 2005 the company has designed and developed medical products for use in screening and early detection of cardiac conditions. Coming from a tradition of helping to promote personal and community health, through exceptional healthcare diagnostic products and solutions, HD Medical, Inc. is committed to delivering “Higher Dimensions in Healthcare”.

The company markets its innovations to medical professionals, large medical institutions and channel partners through operations in the USA and Asia Pacific. HD Medical’s patented technologies and products offer a paradigm shift in clinical diagnostics. Learn more at [www.hdmedicalgroup.com](http://www.hdmedicalgroup.com).
