Düsseldorf, Germany**

**HD MEDICAL OFFERS VISCOPE MD WORLD'S FIRST VISUAL STETHOSCOPE WITH
MURMUR DETECTION AT MEDICA**

- Groundbreaking Stethoscope Employs Patented Murmur Detection Algorithm -

Düsseldorf, Germany – November 6, 2014 – At MEDICA, Booth 16/E20-5, [HD Medical Inc.](http://www.hdmedicalgroup.com) is demonstrating its groundbreaking visual stethoscope [ViScope MD™](#) featuring the world's first murmur detection indicator. This revolutionary stethoscope offers a unique [integrated visual display](#) that lets medical professionals perform dynamic auscultation™ and “see” the heart beats they hear in real-time visual waveforms. ViScope® and ViScope MD are the first stethoscopes to enable documentation of heart data with the bundled [software](#) which can be used for patient reporting and analysis as well as information sharing or for use in teaching situations.

ViScope MD displays heart waveforms for quick and accurate identification of various heart conditions and offers a murmur indicator for rapid diagnosis. Careful auscultation of heart murmurs is an extremely valuable tool in the diagnosis of many cardiac conditions. The timing of a murmur is critical to accurate diagnosis. HD Medical has refined and improved their proprietary IP knowledgebase of heart sounds and algorithms to accurately identify murmurs and other body sounds. With knowledge of the cardiovascular conditions that cause murmurs, patients can receive better treatment and this will also reduce the cost of healthcare.

“HD Medical’s ViScope MD is uniquely capable of determining the presence of a murmur during early screening,” states Muthu Krishnan, Senior Vice President of Business Development for HD Medical. “This

-more-

capability ensures patients can receive early intervention before irreversible pulmonary hypertension or heart failure intervenes.”

ViScope MD with murmur detection is certified for CE compliance and sold from the [website](#) and through HD Medical’s network of resellers.

About HD Medical, Inc.

HD Medical, Inc. is a medical device innovator based in California, USA with Corporate Offices in Sydney, Australia and Research labs in Chennai, India. Since 2005 the company has designed and developed medical products for use in screening and early detection of cardiac conditions. Coming from a tradition of helping to promote personal and community health, through exceptional healthcare diagnostic products and solutions, HD Medical, Inc. is committed to delivering “Higher Dimensions in Healthcare”.

The company markets its innovations to medical professionals, large medical institutions and channel partners through operations in the USA and Asia Pacific. HD Medical’s patented technologies and products offer a paradigm shift in clinical diagnostics. With HD Medical solutions, healthcare professionals see more patients and improve more lives.
